Scores

Good 90-100

Needs Improvement 50-89

Poor 0-49

There is no score for PWA, which stands for progressive web app. The result evaluates if the site is or is not a PWA.

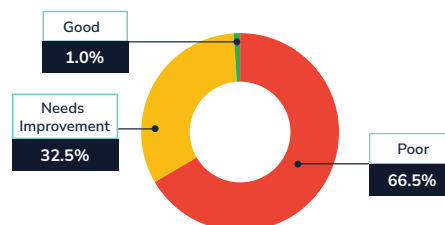

How do you compare?

We tested over 200 B2B industrial manufacturing websites of various sizes. Most of the websites tested missed the mark.

Set your goals on green, representing good scores.

Performance

The vast majority of websites for industrial companies need some or significant technical work to improve page loading speeds.

7
